

Sacramento Clean Cities Stakeholder Meeting

Thursday, January 9th, 2014

1:00-1:45pm
777 12th Street, Suite 300
Sacramento, CA 95814

carbon **BLU**

FLEET EMISSIONS CALCULATOR

This meeting will feature Sedale Turbosky and Todd Trauman from CarbonBLU. They will present CarbonBLU's fleet emissions calculator, including the greenhouse gas emissions calculator as a tool to help our fleets optimize their approach to developing a sustainable fleet strategy.

CarbonBLU is a consulting team of engineering, environmental, and public health executives that helps companies save money by evaluating all the options available when considering reducing their emissions.

Q & A

About Us

carbon **BLU**

CarbonBLU was created as a compliment to our sister company ECO, Inc. and formed with the support of Alternative Fuel Advocates and The Grant Farm.

Alternative Fuel Advocates, LLC

The **Grant** Farm

ECO, Inc. is the world's leading engine and vehicle emissions certification consulting firm, specializing in certification management and regulatory analysis for on-road and off-road engine, vehicle, and equipment manufacturers. Composed of Mechanical Engineering Experts, Legal Advisors, and Certification Specialists who work exclusively in the area of emissions compliance.

Currently certifies the majority of the market including major companies like Westport, BAF, AAF, Icom, Bi-Phase Technologies, and CleanFuel USA, Power Solutions International, and consult for several others.

Peter Ward established Alternative Fuels Advocates, LLC, upon retiring from the California Energy Commission, after over 34 years. Peter was the Program Manager of the Alternative and Renewable Fuel and Vehicle Technology Program, the \$100 million per year (7.5 years) program to develop alternative fuels and advanced vehicle technologies to reduce petroleum consumption and greenhouse gas emissions in California.

The Grant Farm specializes in developing and executing Public Fund Campaigns for entrepreneurs, businesses, government agencies, and nonprofit organizations seeking public funding for their energy and transportation projects.

Collectively, our senior team members have 45+ years of experience in public funding, strategic planning, technical writing, and project advocacy. Since 1995, we have participated in raising more than \$350 million in funding for innovative renewable-energy, transportation, infrastructure, and conservation projects

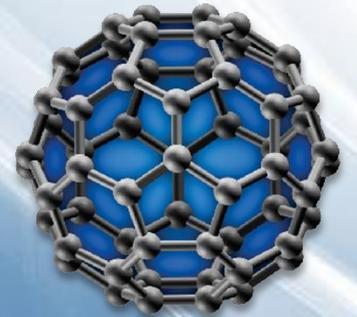

About Us

Our Mission is to Provide Clean Technology to Organizations that Utilize Motorized Fleets

We want to help fleets answer the most important questions facing them today.

Analytics.
Optimization.
Implementation.

Our Mission

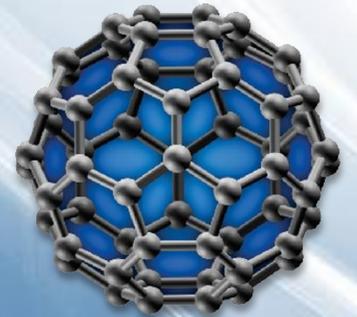

carbon **BLU**

CarbonBLU is fuel and technology agnostic.

We promote fuels and services that best fit our client's goals and initiatives in a sustainable manner.

Our Mission

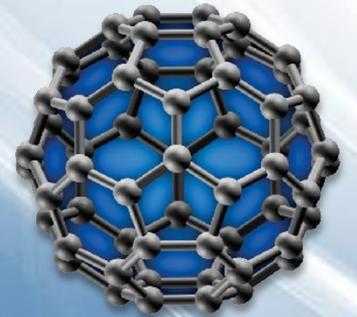

carbon **BLU**

The relationships we've developed allow us to assist fleet managers answer those questions:

- Alternative Fuel and Advanced Technology Vehicles
- Fueling and Charging Infrastructure
- Permitting
- Telematics and Asset Tracking
- New Vehicle and Fleet Purchasing
- Facility Management
- Driver Training

Our Mission

carbon **BLU**

Fleet Optimization

What does fleet optimization mean?

Fleet optimization is the process of

Increasing Efficiency

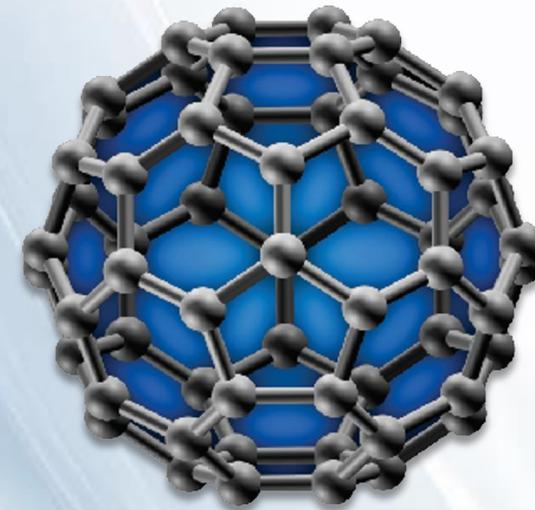

Greening Your Fleet

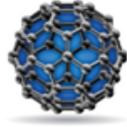

Reducing Operating Costs

Achieving Regulatory Compliance

Mobile Source Fleet Intake Tool

Version 1.3

Introduction

There are a many factors to consider when assessing a fleet to determine the most well rounded approach to your energy optimization needs. This tool will give carbonBLU an accurate snapshot of your company's existing fleet so we can begin to custom design an energy solution.

Why does cB need this information?

Specific company and fleet information, such as size, location, and usage will allow us to custom fit your company's needs to certain geographic areas. Fuel in one county may not be the same price or quality as fuel in another. There might also be special allowances or grants available, depending on fleet usage, location, and composition.

Get Started

Use the buttons to the right to get going on your company's energy solution now. Be as complete and accurate as possible. If there are any questions, don't hesitate to call us.
