Vehicles available for Municipality Evaluation

About the Climate Mayors Electric Vehicle Purchasing Collaborative

In January 2017, the City of Los Angeles and 30 other U.S. cities issued an Electric Vehicle Request for Information (RFI), which helped aggregate and better understand municipal demand for EVs. Feedback and suggestions received through that process led to the development of the Climate Mayors EV Purchasing Collaborative.

The Collaborative works to leverage the buying power of Climate Mayors cities to reduce the costs of EVs and charging infrastructure for all U.S. cities, counties, state governments and public universities, thereby accelerating fleet transitions. The Collaborative also provides training, best practices, educational resources and analysis support, creating a one-stop shop to support EV transitions for public fleets.

Cooperative Purchasing Overview

Cooperative purchasing is a method of procurement conducted by, or on behalf of, one or more governmental units for use by other governmental units. Sourcewell is guided and enabled by M.S. 471.59, the "Joint Exercise of Powers". Sourcewell, as a public agency, establishes and provides nationally leveraged and competitively solicited purchasing contracts on behalf of our 50,000 members. National Auto Fleet Group, National Cooperative Leasing, along with Electric Vehicle Supply Equipment vendors, have been awarded contracts through Sourcewell's competitive process.

To learn more about Sourcewell's competitive procurement process, download the Cooperative Purchasing document below.

Procurement Team Survey

Please take a moment to complete a short questionnaire to help the Climate Mayors team understand the unique structure and needs of your municipal fleet. A team member will get in touch with you for one-on-one follow up to review the information.
